The request for a continued prosecution application (CPA) under 37 CFR 1.53(d) filed on 10/30/2001 is acknowledged. 37 CFR 1.53(d)(1) was amended to provide that the prior application of a CPA must be: (1) a utility or plant application that was filed under 35 U.S.C. 111(a) before May 29, 2000, (2) a design application, or (3) the national stage of an international application that was filed under 35 U.S.C. 363 before May 29, 2000. See *Changes to Application Examination and Provisional Application Practice*, interim rule, 65 Fed. Reg. 14865, 14872 (Mar. 20, 2000), 1233 Off. Gaz. Pat. Office 47, 52 (Apr. 11, 2000). Since a CPA of this application is not permitted under 37 CFR 1.53(d)(1), the improper request for a CPA is being treated as a request for continued examination of this application under 37 CFR 1.114. See *id.* at 14866, 1233 Off. Gaz. Pat. Office at 48.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 98 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Marks.

Claims 66-97 are allowable in that although Marks teaches that cardiac output is important in anesthetized patient's, it does not teach controlling anesthesia delivery based on an indication of cardiac output, as claimed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3736

John teaches in the background section, monitoring vital signs to control anesthesia.

Hokanson et al teaches monitoring brain waves to control anesthesia.
